

Adaptation conditions

Preset: celltype_pairs_Sc0p2_noise0p025_dualStd_7cond · **Model class:** SRNNCellTypePairs

GENERATED by `write_manuscript_tables` from a model BUILT from that preset under the `sfa_and_std` condition. Do not edit by hand – every value here is read off the object, so it cannot disagree with what the sweeps ran. Regenerate after changing the preset.

Generated 28-Aug-2026 15:24:51.

Every sweep runs each grid point under all 7 regimes, on the **same network** (the weight seed is shared), so the comparison is paired.

Condition	SFA timescales τ_a (s)	Depressing routes	Facilitating routes
No Adaptation	none	none	none
SFA (1 tau)	0.25	none	none
SFA Only	0.25, 1.581, 10	none	none
STD (1 tau)	none	EE, EI, IE, II	none
STD Only	none	EE, EI, IE, II	none
SFA + STD (1 tau)	0.25, 1.581, 10	EE, EI, IE, II	none
SFA + STD	0.25, 1.581, 10	EE, EI, IE, II	none
